Summary

Full-Stack Developer with hands-on experience in building end-to-end web applications using React, Node.js, Express, MongoDB, and Redis. Skilled in developing scalable RESTful APIs, implementing secure authentication, and designing responsive user interfaces. Experienced in integrating AI services and computer vision technologies such as LLM APIs and real-time facial expression detection into modern web applications. Proficient in structuring clean, modular code and building production-ready applications with a focus on performance optimization, caching strategies, and maintainable architecture.

Core Competencies: Full-Stack Development, RESTful API Development, React.js, Node.js, Express.js, MongoDB, Redis, AI API Integration, Computer Vision Integration, Responsive UI Development, Component-Based Architecture, Authentication Authorization (JWT), Debugging, Problem Solving, Git GitHub

Education

Raj Kumar Goel Institute of Technology (RKGIT), Ghaziabad 2022 – 2026
B.Tech in Computer Science Engineering
CGPA/Percentage: 84.1%

Father Agnel School (CBSE) 12th Grade
Percentage: 80.2%

Father Agnel School (CBSE) 10th Grade
Percentage: 90.3%

Experience

ML Engineer Intern – Qmansys Infosolutions LLP Jul 2025 – Oct 2025

- Developed an AI-powered fashion recommendation system, including data collection, preprocessing, and ML model training.
- Conducted research and optimized model performance through tuning and evaluation techniques.
- Integrated the model with a user-friendly GUI and contributed to testing and final deployment.

Technical Skills

Languages: JavaScript, Python

Frameworks/Libraries: React.js, React Native, Node.js, Express.js, MediaPipe

Databases: MongoDB, Redis, SQL

Tools: Git, GitHub, Postman, VS Code

Styling: CSS3, SCSS, Tailwind CSS, Responsive UI Development

Others: RESTful API Development, JWT Authentication, AI API Integration, Computer Vision Integration

Projects

AI Interview Report Generator (Node.js, Express, React, MongoDB, Gemini API) – “CareerPilotAI”

- Built an AI-powered web application that analyzes resumes and generates structured interview readiness reports.
- Implemented resume upload and text extraction using PDF parsing to process candidate information.
- Integrated Google Gemini API to evaluate resume content and generate personalized feedback.
- Developed secure REST APIs using Node.js and Express for report generation and data management.
- Stored and managed generated reports using MongoDB for persistent data handling.
- Designed responsive frontend interfaces using React with modern UI styling.

AI-Powered Search Assistant (Perplexity Clone using LLM APIs, React) – “AskNova”

- Developed a Perplexity-like AI search assistant using gemini and Mistral APIs for generating accurate, context-aware responses.
- Built a full-stack application with an interactive chat interface and real-time query handling.
- Implemented secure authentication with email verification and integrated automated email functionality.
- Applied prompt engineering techniques and optimized API calls to enhance response quality and reduce latency.

Mood-based Music Recommendation System (React, Node.js, Express, MediaPipe FaceLandmarker) – “Moodify”

- Built a full-stack web application that detects facial expressions and recommends songs based on user mood.
- Integrated real-time facial expression detection using MediaPipe FaceLandmarker and facial blendshape analysis.
- Implemented rule-based emotion classification (Happy, Sad, Surprised) using facial muscle movement scores.
- Developed backend APIs using Node.js and Express to manage mood detection results and music recommendations.
- Created a responsive React interface with real-time camera input, mood visualization, and music player modules.
- Structured the application using modular architecture combining computer vision inference with full-stack development.

Certifications

HTML5 - The Language - Infosys Springboard	Apr 2026
CSS3 - Infosys Springboard	Apr 2026
JavaScript – Infosys Springboard	Apr 2026
Introduction to Generative AI – Microsoft	Apr 2025
Prompt Engineering for Developers – Infosys Springboard	Apr 2026
Introduction to Artificial Intelligence — Infosys Springboard	Apr 2025
The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert — Udemy	Sept 2025
Learn Everything about AI – 7 Day Bootcamp DevTown (in collaboration with MLSA KIIT Chapter & GDSC KIIT Chapter)	April 2023
